

# Product backlog

Context project: Virtual Humans for Serious Gaming

Group: VH3

# Features

# Bugs

# Technical work

- As a developer I need to have the latest version of goal installed
- As a developer I need to download the Tygron client.

-

# Knowledge acquisition

- As a developer I need to know how the tygron engine works and what kind of actions I (and my agent) can perform.
- As a developer I need to know what kind of game we're planning to make for the first deliverable.
- As a developer I need information on the connector and how to program the agent in goal.
- As a developer I need to be up to date on the latest improvements for the goal engine.
